The Latest Technology. Within Reach.

Get the MEDRAD® Stellant FLEX CT Injection System – Without Making a Capital Investment

Through the TechCARE™ Non-Obsolescence Program, Bayer in Radiology customers can economically upgrade to the latest MEDRAD® CT Smart Injection System without waiting for budget approval. TechCARE can help you standardize to the latest CT technology and protect uptime with:

- One scan room entitlement – the remanufactured MEDRAD® Stellant FLEX CT Injection System
- One control room entitlement – the latest Bayer workstation
- 97% uptime commitment with TechCARE standard
**The New FLEX Appeal.** The Latest CT Injection System from Bayer in Radiology Can Help Your Department Meet Its Financial, Clinical and Organizational Goals.

- Updated scan room and control room technology
- Smaller, economical syringe with less environmental impact
- Newly designed beacon for easy visualization of fluids
- System identifies syringe size, lot and expiration date

MEDRAD® Stellant FLEX enables Contrast Dose Management and automated, accurate documentation.

**The Smart Way to Acquire the MEDRAD® Stellant FLEX.** TechCARE Keeps You Up and Running. And Up to Date.

TechCARE is more than a service contract. It's a non-obsolescence program that combines the latest hardware – like MEDRAD® Stellant FLEX – with world-class service. Hardware upgrades are coordinated with your annual preventative service maintenance visit.

With our TechCARE™ Non-Obsolescence Program:

- 44% of service issues are resolved remotely in less than 15 minutes
- 38% less downtime is experienced during an emergency service event versus non-contract Bayer customers
- 97% uptime commitment with TechCARE standard

**Why Wait?** Choose TechCARE now and prepare for a future upgrade to MEDRAD® Stellant FLEX.

---

1 When the next generation monitor becomes available, customer may request one such enhancement during the term of the agreement to replace their existing monitor with the next generation Certegra® Workstation. When the next generation injector head becomes available, customer may request one such enhancement during the term to replace their existing injector head with a remanufactured injector head. The remanufactured injector head will only be compatible with new Bayer syringes as part of our complete injection system. Mounting options (Overhead Counterpoise System (OCS) and Pedestal) are excluded. Scan room enhancement will not be installed on OCS I (OCS I was last sold in 2004). Only available for MEDRAD® Stellant Dual CT Injection System.

2 Quick issue resolution with average customer calls to Bayer’s 24x7 Technical Assistance Center lasting less than 15 minutes and being resolved 44% of the time. Remote monitoring, diagnosis and resolution of your injector issues through VirtualCare™ Remote Support. Uncompromised quality by only using genuine OEM parts and factory-certified Field Service Engineers.

3 With software purchase.

4 A three-year commitment is required and can be canceled within termination policy.
