

## Experience Contrast Enhanced Mammography with MEDRAD® Stellant FLEX Contrast Injection System

Contrast Enhanced Mammography is  
a valuable clinical tool in the diagnosis  
and staging of primary breast cancer.

**MEDRAD®** Stellant FLEX  
CT Injection System

## MEDRAD® Stellant FLEX CT Injection System for Contrast Enhanced Mammography

**Contrast Enhanced Mammography (CEM) can allow for better visualization of abnormalities in breast tissue that may not be visible with conventional mammography<sup>1</sup>. Using Stellant FLEX in CEM procedures offers enhanced benefits by supporting:**

- Accurate contrast dose administration
- Consistent delivery of contrast for enhancement of tumor tissue
- Simple installation to minimize operational disruption
- Small, intuitive and easy to use design to maximize operability

### Simplify Contrast Administration in Your Acquisition Workflow

**Our reliable Solutions Delivery teams offer customized service solution options based on the unique needs of your department with an emphasis on adding value for the lifetime of your equipment – every step of the way.**

**VirtualCARE®  
Remote  
Support**

**Ongoing  
education  
and training**

**Dedicated project  
management  
organization**

**Seamless integration  
of contrast injection  
details into PACS**
