MEDRAD[®] **Stellant**[®]
CT Injection System

Intelligent, Intuitive, Innovative

CT Imaging Solutions start here...

The Medrad® Stellant® D Dual Syringe CT Injection System is reliable and easy-to-use. It is an integral piece of Bayer's CT imaging solution which also includes the Radimetrics™ Enterprise Platform, Quality Consumables, and Services (Extended warranties including VirtualCare® Remote Support).

Protocol options for the most advanced clinical applications:

- ◆ Designed for complex contrast enhanced CT protocols
- ◆ Creates a tight contrast bolus
- ◆ Enables precisely timed contrast delivery

Clinical benefits of injecting contrast and saline at different ratios to visualize the whole heart

Clinical research has shown that simultaneous injection of contrast and saline, in user-selected ratios, can¹:

- ◆ Provide more uniform attenuation of the right and left ventricles
- ◆ Minimize artifacts by achieving proper attenuation levels
- ◆ Visualize the right coronary arteries and right ventricles in a single study by achieving more uniform attenuation

DualFlow can provide the ability to perform simultaneous injection of contrast and saline with the Medrad® Stellant® D Injection System

A. With single contrast phase

B. With Saline Flush

C. With DualFlow phase²

1. Kerl JM, Ravenel JG, Nguyen SA, et al. "Right heart: split-bolus injection of diluted contrast medium for visualization at coronary CT angiography", *Radiology*. 2008;247:356-364.
2. Jensen, CT, "Dual Flow Contrast Injection for Coronary CTA Improves Visualization of the Right Heart", *NASCI Abstract # 05-A-69-NASCI*.

“Decreasing the amount of contrast agent that we use has really resulted in significant cost savings” **

Certegra® Workstation highlights:

- ◆ Informatics ready platform – enables interconnectivity between your scanner, the Medrad® Stellant® D Dual Head Injector, PACS, RIS, & Speech Recognition Systems
- ◆ Storage and recall of up to 250 protocols
- ◆ Enhanced protocol manager
- ◆ Ability to add Certegra® P3T® 2.0 Software to drive protocol standardization through new capabilities including presets for radiologist-preferred protocols & the ability to save and recall P3T software protocols

Certegra® Workstation is the cornerstone of the Bayer Certegra® @ Point of Care application, the industry's first³ Contrast Dose Management Solution. The data you need is centrally mobilized and instantly available.

Certegra® Workstation for Medrad® Stellant® D Injection System
The command center for intelligent CT Contrast Dose Management Solutions.

VirtualCare® Remote Support Capabilities

With the inclusion of a VirtualCare® Remote Support system, alerts are monitored and resolved proactively. That's forward thinking you can't afford to miss out on.

The Medrad® Stellant® D efficiently increases throughput with:

- ◆ Snap-on / twist-off syringe design
- ◆ Automatic plunger advance and retract when attaching and detaching syringes
- ◆ Automatic filling and priming
- ◆ Multi-phase programming (and patented Hold/Pause feature)
- ◆ Integrated saline test inject
- ◆ Programmable pressure limit

Medrad® Stellant® Dual Saline Syringe Kit (SDS-CTP-SCS) includes a small spike for contrast & a longer, vented spike for saline

System Specifications

Injection Specifications

Flow Rate (range & increments)	0.1 to 10 mL/sec in 0.1 mL increments
Volume (range & increments)	1 mL to syringe capacity in 1 mL increments
Programmable Pressure Limit (psi/kPa)	200 mL syringe: 325 psi, 224.1 kPa
Scan Delay	0-300 seconds (5 minutes) in 1 second increments
Pause	1-900 seconds (15 minutes) in 1 second increments
Hold	Maximum HOLD time is 20 minutes
Syringes (Volume capacity)	200 mL sterile disposable syringe
Maximum Number of Phases	6
Maximum Number of Protocols	250

Miscellaneous Specifications

Electrical Requirements (VAC/Hz)	100-240 VAC, 50/60 Hz, 300 Volts-AMPs
Syringe Heat Maintainer Range	95 degrees F +/-9 degrees 35 degrees C +/-5 degrees
Head Mounting Options	Overhead Counterpoise System or Floor Pedestal (Floor Pedestal includes an Integral IV Pole)
DualFlow	Simultaneous Injection of Contrast and Saline
Medrad® XDS® Extravasation Detection System	Extravasation Detector - Extravasation Detection Device
Certegra® P3T® Cardiac Application	Patient-specific Injection Protocols for Cardiac CTA
Certegra® P3T® Abdomen Application	Abdominal Protocol Optimization Software
Certegra® P3T® PA Application	Pulmonary Angiography Protocol Optimization Software

Mechanical Specifications

	Height	Width	Depth	Weight
Dual Injector Head	6.1" (15.5 cm)	12.1" (30.7 cm)	14.5" (36.8 cm)	17.9 lb (8.1 kg) <i>(without syringe)</i>
Base Unit	11.5" (29.2 cm)	11.0" (27.9 cm)	8.8" (22.2 cm)	13.6 lb (6.2 kg)
Certegra® Workstation (CWS)	12.71" (32.28 cm)	15.58" (39.58 cm)	10.5" (26.67 cm)	17.6 lb (8.0 kg)

Ordering Information

Systems listed include all standard cabling

Catalog Number: SCT 321
Medrad® Stellant® D CT Injection System with Certegra® Workstation with a Pedestal Head Mount

Catalog Number: SCT 322
Medrad® Stellant® D CT Injection System with Certegra® Workstation with Counterpoise System Head Mount

Backed by Bayer reliability, support and service

- Legendary product reliability
- Exceptional after-sales support
- Knowledgeable and reliable technical service
