OCS 1000 mm Ceiling Mount, Portegra 2

*As compared with Medrad® Mark V ProVis® Angiographic Injection System

Medrad® Mark 7 Arterion® has stylish ergonomics that are designed for function; the pedestal with a small footprint and reduced weight increases mobility around your busy lab. And the light head now has a handle to make it easier to position for injection.

Variable Flow

Medrad® VFlow™ Sterile Hand Controller* provides the flexibility to deliver hand injection with the accuracy of an injector to enable consistent contrast delivery.

<p>Control</p> <p>Real-time control of flow rate to enhance contrast delivery across procedure type</p>	<p>Consistency</p> <p>Automated injection for accurate and consistent contrast delivery every time</p>
<p>Flexibility</p> <p>Flexibility to deliver contrast in variable or fixed flow rates with a single injector system</p>	<p>Operator Safety</p> <p>Ability to control the injection procedure from a distance, reducing operator radiation exposure</p>

* Refer to the Operators Manual for a description of the intended use, contraindications, warnings and instructions for use.

The Medrad® Mark 7 Arterion® Injection System is marketed for the administration of intravascular contrast media and common flushing agents during angiographic procedures. See Product Information for Use for specific and complete prescribing information.

Equipment Service by Bayer

The #1 way to keep Bayer devices performing at peak efficiency is with Equipment Service by Bayer at the time of purchase.

Think ahead with VirtualCare®, our round-the-clock remote support.

Plan ahead with our proprietary predictive maintenance and service programs.

Stay ahead with our rapid response teams.
