

Are you Meeting CMS Equipment Maintenance Requirements?

CMS S&C 14-07:

"Imaging/radiologic equipment, whether used for diagnostic or therapeutic purposes, is governed by 42 CFR 482.26(b) (2) and must be maintained per manufacturer's recommendations.¹"

Guidance from CMS requires all diagnostic and therapeutic radiology, medical lasers, and radiation therapy equipment to be maintained per manufacturer's recommendations in order to "ensure an acceptable level of quality."¹

Rely on Engineered Predictive Maintenance by Bayer to ensure compliant, high-quality performance.

Engineered Predictive Maintenance (EPM) is the single most important thing you can do for your MEDRAD® injectors. Our comprehensive annual service is designed to meet FDA Quality System requirements to support the efficient, high-performance operation of your equipment. Bayer certified service engineers have the training and expertise to ensure your equipment is calibrated, parts are proactively replaced, proprietary software is updated to the latest revision, and the equipment is maintained at a high-functioning level to support CMS accreditation standards.

Bayer makes finding CMS-compliant service easy with a robust selection of programs that deliver the most value and options for your facility. Each program provides access to OEM preventative maintenance standards and schedules, as well as VirtualCare™ Remote Support. Choose the appropriate level of service support that meets your needs and budget.

TechCARE

Service Agreement Programs

Comprehensive service PLUS hardware non-obsolescence for your MEDRAD® Stellant Dual Injection System.

DirectCARE™

Service Agreement Programs

Our comprehensive service with uptime guarantees and EPM options designed to fit your workflows.

PartnerCARE™

Flexible options to support your in-house capabilities and resources.

SelectCARE™

Service Agreement Programs

Customized solutions to fit your budget.

Equipment Service

¹ CMS Memorandum re: S&C: 14-07-Hospital, December 20, 2013

Think Ahead. Plan Ahead. Stay Ahead. With Bayer's Equipment Service.

Bayer's Equipment Service is built on optimizing product uptime, maximizing value, and keeping Bayer devices performing at peak efficiency.

Around the world, hospitals and health care organizations rely on Bayer for the comprehensive programs and service essentials that drive productivity, reliability and cost-effective performance. And that's peace of mind that lets you think ahead and focus on your patients.

**Imaging solutions, powered by people.
The logical choice for today and tomorrow.**

Enhancement comes from innovation in hardware and software. But diagnosis is not only about the pixels — **it's about the people.**

In radiology, Bayer believes that **people power imaging.** So we bring together **leading technology, integrated solutions,** and a **team** that helps your people **make a difference for patients.**

That's Radiological
